Grade	Ti&Alloys	Remarks
Grade 1	Unalloyed Titanium	High formability
Grade 2	Unalloyed Titanium	Good combination of strength, formability, ductility and weldability.
Grade 3	Unalloyed Titanium	formability strength, weldability and corrosion resistance.
Grade 4	The highest strength pure unalloyed Titanium	highest strength pure unalloyed Titanium
Grade 5	Ti6Al4V	excellent combination of strength, corrosion resistance, weld and fabricability
Grade 7	contains 0.12 to 0.25% palladium	the added palladium enhanced crevice corrosion resistance at low temperatures and high pH
Grade 9	contains 3.0% aluminium and 2.5% vanadium	a compromise between the ease of welding and manufacturing of the "pure" grades and the high strength of Grade 5.
Grade 12	contains 0.3% molybdenum and 0.8% nickel	High strength. Good Heat and Wear resistance. Highly weldable
